Mowing in November through to March 2026 to be reduced frequency & dependent upon g

The green needs to be spiked (pencil tined) roughly once a fortnight then mowed immediately after. The turquoise dates are the target dates but Peter Oakes is 'the tining man', so it depends on his availability.

If you aren't able to mow on any date please arrange a swap with someone.

If the green can't be mown or doesn't need it, please consider doing another tidying or cleaning or Occasional help is available from Nigel Duckworth, Andrew Spencer, Andy Warman,.

Nigel Dickenson is the key contact for issues with any of the machines.
